

It has come to my attention that the FCC is considering a move to replace the KLOVE signal in our town with LPFM.

It is my strongest desire to convey to you how much this station has benefited our community, my family and friends.

KLOVE is only one of two Christian based stations in my area and the only one that provides us with no commercial Christian music 24/7.

It would be devastating to lose this station to a low band station!KLOVE provides us with music that is NOT available to us through any local stations. Please do not take that away from us.
